◇ Address: University of Macau, Taipa, Macau SAR, China

EDUCATION

Wuhan University	Bachelor of Engineering
Majoring in Electronic Information Engineering	09/2016 - 06/2020
University of Macau	Master of Science
Majoring in Artificial Intelligence applications	08/2021 - 05/2023
University of Macau	Ph.D.
Majoring in Computer and Information Science	08/2023 -

RESEARCH EXPERIENCE

Intelligent Robotic Nursing Assistant	Imperial College London, The Hamlyn Centre
Summer School	07/2019 - 08/2019

- Intelligent nursing system composed of voice module, 3D camera, and robot arm.
- The main technologies involved are speech recognition, face recognition, target recognition, and robotic arm motion trajectory algorithm.
- The project finally realizes the function of automatic feeding and picking up objects by the robotic arm.

Future Urban Intelligent Transportation Augmented Emulation Platform	University of Macau, IOTSC
	08/2021 - 05/2023

- Development of systems including VR simulated driving systems, digital twin systems, SLAM-based autonomous driving systems, and autonomous tracking driving systems

A framework of Robot Exploratory SLAM for 3D Mapping	University of Macau, IOTSC
	05/2023 - 08/2024

- A real-time framework for autonomous robotic mapping in large-scale urban scenes with OpenStreetMap(OSM) as guidance.

3D AgentWorld Lab	The Hong Kong University of Science and Technology (Guangzhou)
Research Assistant	08/2025 - 12/2025

- Contributed to three research manuscripts on simulation scene generation, embodied navigation, and autonomous decision-making for robot learning (1) Scalable Simulation Scene Generation from a Single Image via a Multi-Agent Framework for Robot Learning (2) Causal-Driven Active Uncertainty Mitigation for Zero-Shot Visual Navigation (3) Agentic Zero-Shot Navigation via Bayesian Context and Active Verification

PATENTS

- An autonomous driving test platform based on virtual-reality integration technology. CN Patent CN117191419A. Filed August 25, 2023, and issued December 08, 2023.
